

# AHT Support Services Guide

**This Services Guide contains provisions that define, clarify, and govern the services described in the quote that has been provided to you (the “Quote”). If you do not agree with the terms of this Services Guide, you should not sign the Quote and you must contact us for more information.**

This Services Guide is our “owner’s manual” that generally describes all managed services provided or facilitated by AHT Support (“AHT,” “we,” “us,” or “our”); however, only those services specifically described in the Quote will be facilitated and/or provided to you (collectively, the “Services”).

**Activities or items that are not specifically described in the Quote will be out of scope and will not be included unless otherwise agreed to by us in writing.**

**This Services Guide contains important provisions pertaining to the auto-renewal of the Services in the Quote, as well as fee increases that may occur from time-to-time. Please read this Services Guide carefully and keep a copy for your records.**

## Initial Audit / Diagnostic Services

If an Initial Audit / Diagnostic Services are listed in the Quote, then we will audit your managed information technology environment (the “Environment”) to determine the readiness for, and compatibility with, ongoing managed services. Our auditing services are comprised of:

- Audit to determine general Environment readiness and functional capability
- Review of hardware and software configurations
- Review of current vendor service / warranty agreements for Environment hardware and software
- Basic security vulnerability check
- Basic backup and file recovery solution audit
- Speed test and ISP audit
- Print output audit
- Office telephone vendor service audit
- Asset inventory
- Email and website hosting audit
- IT support process audit

If deficiencies are discovered during the auditing process (such as outdated equipment or unlicensed software), we will bring those issues to your attention and discuss the impact of the deficiencies on our provision of the Services and provide you with options to correct the deficiencies. Please note, unless otherwise expressly agreed by us in writing, auditing services do not include the remediation of any issues, errors, or deficiencies (“Issues”), and we cannot guarantee that all Issues will be detected during the auditing process. Issues that are discovered in the Environment after the auditing process is completed may be addressed in one or more subsequent quotes.

## Onboarding Services

If onboarding services are listed in the Quote, then one or more of the following services will be provided to you.

- Uninstall any monitoring tools or other software installed by previous IT service providers.
- Compile a full inventory of all protected servers, workstations, and laptops.
- Uninstall any previous endpoint protection and install our managed security solutions (as indicated in the Quote).
- Install remote support access agents (*i.e.*, software agents) on each managed device to enable remote support.
- Configure Windows® and application patch management agent(s) and check for missing security updates.
- Uninstall unsafe applications or applications that are no longer necessary.
- Optimize device performance including disk cleanup and endpoint protection scans.
- Review firewall configuration and other network infrastructure devices.
- Review status of battery backup protection on all mission critical devices.
- Stabilize network and assure that all devices can securely access the file server.
- Review and document current server configuration and status.
- Determine existing business continuity strategy and status; prepare backup file recovery and incident response option for consideration.
- Review password policies and update user and device passwords.
- As applicable, make recommendations for changes that should be considered to the managed environment.

This list is subject to change if we determine, in our discretion, that different or additional onboarding activities are required.

If deficiencies are discovered during the onboarding process, we will bring those issues to your attention and discuss the impact of the deficiencies on our provision of our monthly managed services. **Please note, unless otherwise expressly stated in the Quote, onboarding-related services do not include the remediation of any issues, errors, or deficiencies (“Issues”), and we cannot guarantee that all Issues will be detected during the onboarding process.**

The duration of the onboarding process depends on many factors, many of which may be outside of our control—such as product availability/shortages, required third party vendor input, etc. As such, we can estimate, but cannot guarantee, the timing and duration of the onboarding process. We will keep you updated as the onboarding process progresses

## Ongoing / Recurring Services

Ongoing/recurring services are services that are provided to you on an ongoing basis and, unless otherwise indicated in a Quote, are billed to you monthly. Some ongoing/recurring services will begin with the commencement of onboarding services; others will begin when the onboarding process is completed. Please direct any questions about start or “go live” dates to your technician.

## Managed Services

The following Services, if listed in the Quote, will be provided to you.

<u>SERVICES</u>	<u>GENERAL DESCRIPTION</u>
<b>Backup and File Recovery</b>	<ul style="list-style-type: none"><li>• 24/7 monitoring of backup system, including offsite backup, offsite replication, and an onsite backup appliance (“Backup Appliance”)</li><li>• Troubleshooting and remediation of failed backup disks</li><li>• Preventive maintenance and management of imaging software</li><li>• Firmware and software updates of backup appliance</li><li>• Problem analysis by the network operations team</li><li>• Monitoring of backup successes and failures</li><li>• Daily recovery verification</li></ul> <p><u>Backup Data Security:</u> All backed up data is encrypted in transit and at rest in 256-bit AES encryption. All facilities housing backed up data implement physical security controls and logs, including security cameras, and have multiple internet connections with failover capabilities.</p> <p><u>Backup Retention:</u> Backed up data will be retained 30 days</p> <p><u>Backup Alerts:</u> Managed servers will be configured to inform of any backup failures.</p> <p><u>Recovery of Data:</u> If you need to recover any of your backed up data, then the following procedures will apply:</p> <ul style="list-style-type: none"><li>• <u>Service Hours:</u> Backed up data can be requested during our normal business hours, which are currently M-F, 9am – 5pm MST</li><li>• <u>Request Method.</u> Requests to restore backed up data should be made through one of the following methods:<ul style="list-style-type: none"><li>○ Email: Helpdesk@AHTSupport.net</li><li>○ Telephone: 720-262-9160 opt 2</li></ul></li><li>• <u>Restoration Time:</u> We will endeavor to restore backed up data as quickly as possible following our receipt of a request to do so; however, in all cases data restoration services are subject to (i) technician availability and (ii) confirmation that</li></ul>

	<p>the restoration point(s) is/are available to receive the backed up data.</p>
<p><b>Backup Monitoring</b></p>	<ul style="list-style-type: none"> <li>• Monitors backup status for certain backup applications then-installed in the managed environment, such as successful completion of backup, failure errors, and destination free space restrictions/limitations.</li> <li>• Helps ensure adequate access to Client’s data on the event of loss of data or disruption of certain existing backup applications.</li> <li>• <b>Note: Backup monitoring is limited to monitoring activities only and is not a backup and file recovery solution.</b></li> </ul>
<p><b>Block of Hours / Allocated Consulting Hours</b></p>	<p>If you purchase one or more blocks of technical support or consulting hours from AHT, then we will provide our professional information technology consulting services to you from time to time on an ongoing, “on demand” basis (“Services”).</p> <p>The specific scope, timing, term, and pricing of the Services (collectively, “Specifications”) will be determined between you and us at the time that you request the Services from us.</p> <p>You and we may finalize the Specifications (i) by exchanging emails confirming the relevant terms, or (ii) by you agreeing to an invoice, purchase order, or similar document we send to you that describes the Specifications (an “Invoice”), or in some cases, (iii) by us performing the Services or delivering the applicable deliverables in conformity with the Specifications.</p> <p>If we provide you with an email or an Invoice that contains details or terms for the Services that are different than the terms of than the Quote, then the terms of the email or Invoice (as applicable) will control for those Services only.</p> <p>A Service will be deemed completed upon our final delivery of the applicable portions of Specifications unless a different completion milestone is expressly agreed upon in the Specifications (“Service Completion”). (For example, sales of hardware will be deemed completed when the hardware is delivered to you; licensing will be completed when the licenses are provided to you, etc.) Any defects or deviations from the Specifications must be pointed out to us, in writing, within ten (10) days after the date of Service Completion. After that time, any issues or remedial activities related to the Services will be billed to you at our then-current hourly rates.</p> <p>Unless we agree otherwise in writing, Services will be provided only during our normal business hours, which are currently 8 – 5 PM Mountain Time. Services provided outside of our normal business hours are subject to increased fees and technician availability and require your and our mutual consent to implement.</p>

	<p>The priority given to implementing the Services will be determined our reasonable discretion, considering any milestones or deadlines expressly agreed upon in an invoice or email from AHT. If no specific milestone or deadline is agreed upon, then the Services will be performed in accordance with your needs, the specific requirements of the job(s), and technician availability.</p>
<p><b>Dark Web Monitoring</b></p>	<p>Credentials supplied by Client will be added into a system that continuously uses human and machine-powered monitoring to determine of the supplied credentials are located on the dark web.</p> <p>If compromised credentials are found, they are reported to Help Desk Services staff who will review the incident and notify affected end-users.</p> <p>Dark web monitoring can be a highly effective tool to reduce the risk of certain types of cybercrime; however, we do not guarantee that the dark web monitoring service will detect all actual or potential uses of your designated credentials or information.</p>
<p><b>Email Threat Protection</b></p>	<ul style="list-style-type: none"> <li>• Managed email protection from phishing, business email compromise (BEC), SPAM, and email-based malware.</li> <li>• Friendly Name filters to protect against social engineering impersonation attacks on managed devices.</li> <li>• Protection against social engineering attacks like whaling, CEO fraud, business email compromise or W-2 fraud.</li> <li>• Protects against newly registered and newly observed domains to catch the first email from a newly registered domain.</li> <li>• Protects against display name spoofing.</li> <li>• Protects against “looks like” and “sounds like” versions of domain names.</li> </ul> <p>Please see <a href="#">Anti-Virus; Anti-Malware</a> and <a href="#">Breach / Cyber Security Incident Recovery</a> sections below for important details.</p> <p>All hosted email is subject to the terms of our <a href="#">Hosted Email Policy</a> and our <a href="#">Acceptable Use Policy</a>.</p>
<p><b>Endpoint Antivirus &amp; Malware Protection</b></p>	<ul style="list-style-type: none"> <li>• Utilizes artificial intelligence and machine learning to provide a comprehensive and adaptive protection paradigm to managed endpoints.</li> <li>• Detects unauthorized behaviors of users, applications, or network servers.</li> <li>• Blocks suspicious actions before execution.</li> </ul>

	<ul style="list-style-type: none"> <li>• Analyzes suspicious app activity in isolated sandboxes.</li> <li>• Antivirus and malware protection for managed devices such as laptops, desktops, and servers.</li> <li>• Protects against file-based and fileless scripts, as well as malicious JavaScript, VBScript, PowerShell, macros and more.</li> <li>• Allows whitelisting for legitimate scripts.</li> <li>• Allows for blocking of unwanted web content.</li> <li>• Detects advanced phishing attacks.</li> <li>• Detects / prevents content from IP addresses with low reputation.</li> </ul> <p>* Please see <a href="#">Anti-Virus; Anti-Malware</a> and <a href="#">Breach / Cyber Security Incident Recovery</a> sections below for important details.</p>
<p><b>Extended Detection &amp; Response (XDR)</b></p>	<ul style="list-style-type: none"> <li>• Automated correlation of data across multiple security layers* — email, endpoint, server, cloud workload, and the managed network, enabling faster threat detection.</li> <li>• Provides extended malware sweeping, hunting, and investigation.</li> <li>• Allows whitelisting for legitimate scripts.</li> <li>• Next-generation deep learning malware detection, file scanning, and live protection for workstation operating system.</li> <li>• Web access security and control, application security and control, intrusion prevention system.</li> <li>• Data loss prevention, exploit prevention, malicious traffic detection, disk and boot record protection.</li> <li>• Managed detection, root cause analysis, deep learning malware analysis, and live response.</li> <li>• On-demand endpoint isolation, advanced threat intelligence, and forensic data export.</li> </ul> <p>* Requires at least two layers (e.g., endpoint, email, network, servers, and/or cloud workload.)</p> <p>Please see <a href="#">Anti-Virus; Anti-Malware</a> and <a href="#">Breach / Cyber Security Incident Recovery</a> sections below for important details.</p>
<p><b>End User Security Awareness Training</b></p>	<ul style="list-style-type: none"> <li>• Online, on-demand training videos (multi-lingual).</li> <li>• Online, on-demand quizzes to verify employee retention of training content.</li> <li>• Baseline testing to assess the phish-prone percentage of users; simulated phishing email campaigns designed to educate employees about security threats.</li> </ul> <p>Please see <a href="#">Anti-Virus; Anti-Malware</a> and <a href="#">Breach / Cyber Security Incident Recovery</a> sections below for important details.</p>
<p><b>Firewall Solution</b></p>	<ul style="list-style-type: none"> <li>• Monitors, updates (software/firmware), and supports Client-supplied firewall appliance.</li> <li>• Helps to prevent hackers from accessing internal network(s) from outside the network(s), while providing secure and encrypted</li> </ul>

(firewall appliance provided / purchased by Client)	remote network access; provides antivirus scanning for all traffic entering and leaving the managed network; provides website content filtering functionality.
<b>Hardware as a Service (HaaS)</b>	<ul style="list-style-type: none"> <li>• <u>Scope</u>. Provision and deployment of hardware and devices listed in the Quote or other applicable schedule (“HaaS Equipment”).</li> <li>• <u>Deployment</u>. We will deploy the HaaS Equipment within the timeframe stated in the Quote, provided that you promptly provide all information that we reasonably request from you to complete deployment. This deployment guaranty does not apply to any software, other managed services, or hardware devices other than the HaaS Equipment. If you wish to delay the deployment of the HaaS Equipment, then you may do so if you give us written notice of your election to delay no later than five (5) days following the date you sign the Quote. Deployment shall not extend beyond two (2) months following the date on which you sign the Quote. You will be charged at the rate of fifty percent (50%) of the monthly recurring fees for the HaaS-related services during the period of delay. Following deployment, we will charge you the full monthly recurring fee (plus other usage fees as applicable) for the full term indicated in the Quote.</li> <li>• <u>Repair/replacement of HaaS Equipment</u>. AHT will repair or replace HaaS Equipment by the end of the business day following the business day on which the applicable problem is identified by, or reported to, AHT and has been determined by AHT to be incapable of being remediated remotely.  This warranty does not include the time required to rebuild your system, such as the time required to configure a replacement device, rebuild a RAID array, reload the operating system, reload and configure applications, and/or restore from backup (if necessary).</li> <li>• <u>Technical Support for HaaS Equipment</u>. We will provide technical support for HaaS Equipment in accordance with the <a href="#">Service Levels</a> listed in this Services Guide.</li> <li>• <u>In-Warranty Repair</u>. AHT will repair or replace HaaS Equipment by the end of the business day following the business day on which the applicable problem is identified by, or reported to, AHT and has been determined by AHT to be incapable of being remediated remotely.</li> <li>• <u>Periodic Replacement of HaaS Equipment</u>. From time to time and in our discretion, we may decide to swap out older HaaS Equipment for updated or newer equipment. (Generally, equipment that is five years old or older may be appropriate for replacement). If we elect to swap out HaaS Equipment due to normal, periodic</li> </ul>

replacement, then we will notify you of the situation and arrange a mutually convenient time for such activity.

- Usage. You will use all HaaS Equipment for your internal business purposes only. You shall not sublease, sublicense, rent or otherwise make the HaaS Equipment available to any third party without our prior written consent. You agree to refrain from using the HaaS Equipment in a manner that unreasonably or materially interferes with our other hosted equipment or hardware, or in a manner that disrupts or that is likely to disrupt the services that we provide to our other clientele. We reserve the right to throttle or suspend your access and/or use of the HaaS Equipment if we believe, in our sole but reasonable judgment, that your use of the HaaS Equipment violates the terms of the Quote, this Services Guide, or the Agreement.
- Credits/Remedies. If AHT fails to meet the warranties in this section and the failure materially and adversely affects your hosted environment, you are entitled to a credit in the amount of 5% of the monthly fee per hour of downtime (after the initial one (1) hour allocated to problem identification), up to 100% of your monthly fee for the affected HaaS Equipment. In no event shall a credit exceed 100% of the applicable month's monthly fee for the affected equipment.
- Return of HaaS Equipment. Unless we expressly direct you to do so, you shall not remove or disable, or attempt to remove or disable, any software agents that we installed in the HaaS Equipment. **Doing so could result in network vulnerabilities and/or the continuation of license fees for the software agents for which you will be responsible, and/or the requirement that we remediate the situation at our then-current hourly rates, for which you will also be responsible.** Within ten (10) days after the termination of HaaS-related Services, Client will provide AHT access to the premises at which the HaaS Equipment is located so that all such equipment may be retrieved and removed by us. If you fail to provide us with timely access to the HaaS Equipment or if the equipment is returned to us damaged (normal wear and tear excepted), then we will have the right to charge you, and you hereby agree to pay, the replacement value of all such unreturned or damaged equipment.

### Managed Detection & Response (MDR)

- 24x7 Managed network detection and response.
  - Real time and continuous (24x7) monitoring and threat hunting.
  - Real time threat response.
  - Alerts handled in accordance with our Alert Notification table, below.
  - Security reports, such as privileged activities, security events, and network reports, available upon request.
  - 24x7x365 access to a security team for incident response\*
- \* Remediation services provided on a time and materials basis. Please see [Anti-Virus; Anti-Malware](#) and [Breach / Cyber Security Incident Recovery](#) sections below for important details.

## NIST Risk Assessment

- Perform a cybersecurity assessment under NIST CSF using the NIST Risk Management Framework & NIST 800-53.
- Identifies how Client currently assesses, mitigates, and tracks its cybersecurity requirements.
- Identifies authorized and unauthorized devices in the managed network.
- Identifies gaps or deficiencies in the Client's operations that would prevent compliance under NIST CSF.

The assessment will cover the following five core areas of the NIST framework:

IDENTIFY	PROTECT	DETECT	RESPOND	RECOVER
<ul style="list-style-type: none"> <li>• ASSET MANAGEMENT</li> <li>• BUSINESS ENVIRONMENT</li> <li>• GOVERNANCE</li> <li>• RISK ASSESSMENT</li> <li>• RISK MANAGEMENT STRATEGY</li> <li>• SUPPLY CHAIN RISK MANAGEMENT</li> </ul>	<ul style="list-style-type: none"> <li>• ACCESS CONTROL</li> <li>• AWARENESS &amp; TRAINING</li> <li>• DATA SECURITY</li> <li>• INFO PROTECTION PROCESS &amp; PROCEDURES</li> <li>• MAINTENANCE</li> <li>• PROTECTIVE TECHNOLOGY</li> </ul>	<ul style="list-style-type: none"> <li>• ANOMALIES &amp; EVENTS</li> <li>• SECURITY CONTINUOUS MONITORING</li> <li>• DETECTION PROCESSES</li> </ul>	<ul style="list-style-type: none"> <li>• RESPONSE PLANNING</li> <li>• COMMUNICATIONS</li> <li>• ANALYSIS</li> <li>• MITIGATION</li> <li>• IMPROVEMENTS</li> </ul>	<ul style="list-style-type: none"> <li>• RECOVERY PLANNING</li> <li>• IMPROVEMENTS</li> <li>• COMMUNICATIONS</li> </ul>

The results of the assessment will be provided in a report that will identify detected risks and your organization's current maturity levels (*i.e.*, indicators that represent the level of capabilities within your organization's security program) and will propose actionable activities to help increase relevant maturity levels and augment your organization's security posture.

**Please Note:** This service is limited to an assessment/audit only. Remediation of issues discovered during the assessment, as well as additional solutions required to bring your managed environment into compliance, are not part of this service. After the audit is complete, we will discuss the results with you to determine what steps, if any, are needed to bring your organization into full compliance.

## Password Manager

- **Password Vault:** Securely store and organize passwords in a secure digital location accessed through your browser or an app.
- **Password Generation:** Generate secure passwords with editable options to meet specific criteria.
- **Financial Information Vault:** Securely store and organize financial information such as bank accounts and credit card information in a secure digital location accessed through your browser or an app.

	<ul style="list-style-type: none"> <li>• <b>Contact Information Vault:</b> Store private addresses and personal contact information within your vault accessed through your browser or an app.</li> <li>• <b>Single Sign-On:</b> Single sign-on grants authorized employees or users access to applications with a single set of login credentials, based on a user’s identity and permission levels. Single sign-on relies on SAML (Security Assertion Markup Language), a secure, behind-the-scenes protocol, to authenticate users to cloud, mobile, legacy, and on-premise apps.</li> <li>• <b>Browser App:</b> Browser extension permits easy access to all of your information including the vaults, financial information, contact information, and single sign-on through the app.</li> <li>• <b>Smart-Phone App:</b> Mobile phone app enables access to your vault and stored information on your mobile device.</li> </ul>
<p><b>Penetration (Pen) Testing</b></p>	<p><b>External Pen Testing:</b> exposes vulnerabilities in your internet-facing systems, networks, firewalls, devices, and/or web applications that could lead to unauthorized access.</p> <p><b>Internal Pen Testing:</b> Validates the effort required for an attacker to overcome and exploit your internal security infrastructure after access is gained.</p> <p><b>PCI Pen Testing:</b> Using the goals set by the PCI Security Standards Council, this test involves both external and internal pen testing methodologies.</p> <p><b>Web App Pen Testing:</b> Application security testing using attempted infiltration through a website or web application utilizing PTES and the OWASP standard testing checklist.</p> <p>Please see <a href="#">additional terms for Penetration Testing</a> below.</p>
<p><b>Remote Helpdesk</b></p>	<ul style="list-style-type: none"> <li>• Remote support provided during normal business hours for managed devices and covered software</li> <li>• Tiered-level support provides a smooth escalation process and helps to ensure effective solutions.</li> </ul>
<p><b>Remote Infrastructure Maintenance &amp; Support</b></p>	<ul style="list-style-type: none"> <li>• Configuration, monitoring, and preventative maintenance services provided for the managed IT infrastructure</li> <li>• If remote efforts are unsuccessful, then AHT will dispatch a technician to the Client’s premises to resolve covered incidents (timing of onsite support is subject to technician availability and scheduling)</li> </ul>
<p><b>Remote Monitoring and Management</b></p>	<p>Software agents installed in Covered Equipment (defined below) report status and IT-related events on a 24x7 basis; alerts are generated and responded to in accordance with the Service Levels described below.</p>

- Includes capacity monitoring, alerting us to severely decreased or low disk capacity (covers standard fixed HDD partitions, not external devices such as USB or mapped drives)
- Includes routine operating system inspection and cleansing to help ensure that disk space is increased before space-related issues occur.
- Review and installation of updates and patches for supported software.

In addition to the above, our remote monitoring and management service will be provided as follows:

Event	Server	Workstation
Hardware Failures	Yes	No
Device Offline	Yes	No
Failed/Missing Backup	Yes	No
Failed/Missing Updates	Yes	Yes
Low Disk Space	Yes	No
Agent missing/misconfigured	Yes	Yes
Excessive Uptime	Yes	No
Automatic Reboots (weekly)	No	Yes

### Security Incident & Event Monitoring (SIEM)

The SIEM service utilizes threat intelligence to detect threats that can exploit potential vulnerabilities against your managed network.

- Initial Assessment. Prior to implementing the SIEM service, we will perform an initial assessment of the managed network at your premises to define the scope of the devices/network to be monitored (the “Initial Assessment”).
- Monitoring. The SIEM service detects threats from external facing attacks as well as potential insider threats and attacks occurring inside the monitored network. Threats are correlated against known baselines to determine the severity of the attack.
- Alerts & Analysis. Threats are reviewed and analyzed by third-party human analysts to determine true/false positive dispositions and actionability. If it is determined that the threat was generated from an actual security-related or operationally deviating event (an “Event”), then you will be notified of that Event.

Events are triggered when conditions on the monitored system meet or exceed predefined criteria (the “Criteria”). Since the Criteria are established and optimized over time, the first thirty (30) days after deployment of the SIEM services will be used to identify a

	<p>baseline of the Client’s environment and user behavior. During this initial thirty (30) day period, Client may experience some “false positives” or, alternatively, during this period not all anomalous activities may be detected.</p> <p>Note: The SIEM service is a monitoring and alert-based system only; remediation of detected or actual threats are not within the scope of this service and may require Client to retain AHT’s services on a time and materials basis.</p>
<p><b>Server Monitoring &amp; Maintenance</b></p>	<ul style="list-style-type: none"> <li>• Software agents installed in covered servers report status and IT-related events on a 24x7 basis; alerts are generated and responded to in accordance with the Service Levels described below.</li> <li>• Online status monitoring, alerting us to potential failures or outages</li> <li>• Capacity monitoring, alerting us to severely decreased or low disk capacity (covers standard fixed HDD and SSD partitions, not external devices such as USB or mapped network drives)</li> <li>• Performance monitoring, alerting us to unusual processor or memory usage</li> <li>• Server essential service monitoring, alerting us to server role-based service failures</li> <li>• Endpoint protection agent monitoring, alerting us to potential security vulnerabilities</li> <li>• Routine operating system inspection and cleansing</li> <li>• Secure remote connectivity to the server and collaborative screen sharing</li> <li>• Review and installation of updates and patches for Windows and supported software</li> <li>• Asset inventory and server information collection</li> </ul>
<p><b>Two Factor Authentication</b></p>	<ul style="list-style-type: none"> <li>• Advanced two factor authentication with advanced admin features.</li> <li>• Secures on-premises and cloud-based applications.</li> <li>• Permits custom access policies based on role, device, location.</li> <li>• Identifies and verifies device health to detect “risky” devices</li> </ul>
<p><b>Server Next-Generation Antivirus</b></p>	<p>Primary endpoint security layer. Software agents installed in covered server devices protect against malware and prevents intruder access. Used in coordination with other endpoint security layers and security solutions to form a comprehensive defense strategy.</p> <ul style="list-style-type: none"> <li>• Next-generation deep learning malware detection, file scanning, and live protection for Server OS</li> <li>• Web access security and control, application security and control, intrusion prevention system</li> <li>• Data loss prevention, exploit prevention, malicious traffic detection, disk and boot record protection</li> </ul>

<p><b>Software Licensing</b> (applies to all software licensed by or through AHT)</p>	<p>All software provided to you by or through AHT is licensed, not sold, to you (“Software”). In addition to any Software-related requirements described in AHT’s Master Services Agreement, Software may also be subject to end user license agreements (EULAs), acceptable use policies (AUPs), and other restrictions all of which must be strictly followed by you and any of your authorized users.</p> <p>When installing/implementing software licenses in the managed environment or as part of the Services, we may accept (and you agree that we may accept) any required EULAs or AUPs on your behalf. <b>You should assume that all Software has an applicable EULA and/or AUP to which your authorized users and you must adhere.</b> If you have any questions or require a copy of the EULA or AUP, please contact us.</p>
<p><b>Updates &amp; Patching</b></p>	<ul style="list-style-type: none"> <li>• Remotely deploy updates (e.g., x.1 to x.2), as well as bug fixes, minor enhancements, and security updates as deemed necessary on all managed hardware.</li> <li>• Perform minor hardware and software installations and upgrades of managed hardware.</li> <li>• Perform minor installations (i.e., tasks that can be performed remotely and typically take less than thirty (30) minutes to complete).</li> <li>• Deploy, manage, and monitor the installation of approved service packs, security updates and firmware updates as deemed necessary on all applicable managed hardware.</li> </ul>
<p><b>Virtual Chief Information Officer (vCIO)</b></p>	<p>Act as the main point of contact for certain business-related IT issues and concerns.</p> <ul style="list-style-type: none"> <li>• Assist in creation of information/data-related plans and budgets.</li> <li>• Provide strategic guidance and consultation across different technologies.</li> <li>• Create company-specific best standards and practices.</li> <li>• Provide education and recommendations for business technologies.</li> <li>• Participate in scheduled meetings to maintain goals.</li> <li>• Maintain technology documentation.</li> <li>• Assess and make recommendations for improving technology usage and services.</li> </ul>
<p><b>Voice Over IP (VoIP) Services</b></p>	<ul style="list-style-type: none"> <li>• Scalable VoIP-based telephone service with call transferring, voicemail, caller ID, call hold, conference calling, and call waiting functionalities.</li> <li>• Central control panel provides access to VoIP-related configurations, including physical address registration, call</li> </ul>

	<p>routing, updating greetings, and ability to turn on/off service features.</p> <ul style="list-style-type: none"> <li>• Ability to use mobile app dialing</li> </ul> <p><b>Important:</b> There are <a href="#">additional terms</a> related to the VoIP service, including your use of E911 features, toward the end of this Services Guide. Please read them carefully. You may be required to sign an additional consent form indicating your understanding and acceptance of the limitations of 911 dialing using the VoIP services.</p>
<p><b>Wi-Fi Services</b></p>	<ul style="list-style-type: none"> <li>• AHT will install at the Client’s premises Wireless Access Points to provide a bandwidth of at least 10Mbps (download) in all areas requiring wireless network coverage, as agreed upon by AHT and Client.</li> <li>• AHT will maintain, supervise, and manage the wireless system at no additional cost.</li> <li>• Installed equipment, if provided by AHT, will be compatible with the then-current industry standards.</li> <li>• AHT will provide remote support services during normal business hours to assist with device connectivity issues. (Support services will be provided on a “best efforts” basis only, and Client understands that some end-user devices may not connect to the wireless network, or they may connect but not perform well).</li> </ul> <p><u>Please note:</u> Any Wi-Fi devices, such as access points or routers, that are supplied by Client cannot be older than five (5) years from the applicable device’s original date of manufacture, and in all cases must be supported by the manufacturer of the device(s).</p>
<p><b>Workstation Next-Generation Antivirus</b></p>	<p>Primary endpoint security layer. Software agents installed in covered devices protect against malware and prevent intruder access. Used in coordination with other endpoint security layers and security solutions to create a comprehensive defensive strategy.</p> <ul style="list-style-type: none"> <li>• Next-generation deep learning malware detection, file scanning, and live protection for Workstation OS.</li> <li>• Web access security and control, application security and control, intrusion prevention system.</li> <li>• Data loss prevention, exploit prevention, malicious traffic detection, disk, and boot record protection.</li> </ul>
<p><b>Workstation Monitoring &amp; Maintenance</b></p>	<p>Software agents installed in covered workstations report status and IT-related events on a 24x7 basis; alerts are generated and responded to in accordance with the Service Levels described below.</p> <ul style="list-style-type: none"> <li>• Online status monitoring, alerting us to potential failures or outages.</li> </ul>

- Capacity monitoring, alerting us to severely decreased or low disk capacity (covers standard fixed HDD and SSD partitions, not external devices such as USB or mapped network drives).
- Performance monitoring, alerting us to unusual processor or memory usage.
- Endpoint protection agent monitoring, alerting us to potential security vulnerabilities.
- Routine operating system inspection and cleansing.
- Secure remote connectivity to the workstation and collaborative screen sharing.
- Review and installation of updates and patches for Windows and supported software.
- Asset inventory and workstation information collection.

### **Covered Equipment / Hardware / Software**

Managed Services will be applied to the devices on which we install software monitoring agents (“Covered Hardware”). You will be provided with an updated list of Covered Hardware once all software agents have been installed. The list of Covered Hardware may be modified by mutual consent (email is sufficient for this purpose); however, we reserve the right to modify the list of Covered Hardware at any time if we discover devices that were not previously included in the list of Covered Hardware and which are receiving Services. We will provide technical support for Covered Devices; however, all Covered Devices must be covered, at all times and at your cost, under a then-current manufacturer’s service plan.

We will provide support for any software applications that are licensed through us. Such software (“Supported Software”) will be supported on a “best effort” basis only, and any support required beyond Level 2-type support will be facilitated with the applicable software vendor/producer. Coverage for non-Supported Software is outside of the scope of the Quote and, if provided to you, will be provided to you on a “best effort” basis only with no guarantee of remediation.

If we are unable to remediate an issue with non-Supported Software, then you will be required to contact the manufacturer/distributor of the software for further support. Please note: Manufacturers/distributors of such software may charge fees, some of which may be significant, for technical support; therefore, we strongly recommend that you maintain service or support contracts for all non-Supported Software (“Service Contract”). If you request that we facilitate technical support for non-Supported Software, then if you have a Service Contract in place, our facilitation services will be provided at no additional cost to you.

Should our technicians provide you with general advice concerning non-Supported Software, the provision of that advice should be viewed as an accommodation to you, and not as a continuing obligation or guarantee by AHT to continue to provide such support or advice to you.

In this Services Guide, Covered Hardware and Supported Software will be referred to as the “Environment” or “Covered Equipment.”

### **Physical Locations Covered by Services**

Services will be provided remotely unless, in our discretion, we determine that an onsite visit is required. AHT visits will be scheduled in accordance with the priority assigned to the issue (below) and are subject to technician availability. Unless we agree otherwise, all onsite Services will be provided at Client’s primary business location. Additional fees may apply for onsite visits: Please review the Service Level section below for more details.

## Term; Termination

The Services will commence, and billing will begin, on the date indicated in the Quote (“Commencement Date”) and will continue through the initial term listed in the Quote (“Initial Term”). We reserve the right to delay the Commencement Date until all onboarding/transition services (if any) are completed, and all deficiencies / revisions identified in the onboarding process (if any) are addressed or remediated to AHT’s satisfaction.

The Services will continue through the Initial Term until terminated as provided in the Agreement, the Quote, or as indicated in this section (the “Service Term”).

**Per Seat Licensing: Regardless of the reason for the termination of the Services, you will be required to pay for all per seat licenses (such as, if applicable, Microsoft NCE licenses) that we acquire on your behalf. Please see “Per Seat License Fees” in the Fees section below for more details.**

**Removal of Software Agents; Return of Firewall & Backup Appliances:** Unless we expressly direct you to do so, you will not remove or disable, or attempt to remove or disable, any software agents that we installed in the managed environment or any of the devices on which we installed software agents. Doing so without our guidance may make it difficult or impracticable to remove the software agents, which could result in network vulnerabilities and/or the continuation of license fees for the software agents for which you will be responsible, and/or the requirement that we remediate the situation at our then-current hourly rates, for which you will also be responsible. Depending on the particular software agent and the costs of removal, we may elect to keep the software agent in the managed environment but in a dormant and/or unused state.

Within ten (10) days after being directed to do so, Client will remove, package and ship, at Client’s expense and in a commercially reasonable manner, all hardware, equipment, and accessories provided to Client by AHT that were used in the provision of the Services. If you fail to timely return all equipment to us, or if the equipment is returned to us damaged (normal wear and tear excepted), then we will have the right to charge you, and you hereby agree to pay, the replacement value of all such unreturned or damaged equipment.

## Minimum Requirements / Exclusions

The scheduling, fees and provision of the Services are based upon the following assumptions and minimum requirements:

- Server hardware must be under current warranty coverage.
- All equipment with Microsoft Windows® operating systems must be running then-currently supported versions of such software and have all of the latest Microsoft service packs and critical updates installed.
- All software must be genuine, licensed, and vendor-supported.
- Server file systems and email systems (if applicable) must be protected by licensed and up-to-date virus protection software.
- The managed environment must have a currently licensed, vendor-supported server-based backup solution that can be monitored.
- All wireless data traffic in the managed environment must be securely encrypted.
- All servers must be connected to working UPS devices.
- Recovery coverage assumes data integrity of the backups or the data stored on the backup devices. We do not guarantee the integrity of the backups or the data stored on the backup devices. Server restoration will be to the point of the last successful backup.
- Client must provide all software installation media and key codes in the event of a failure.

- Any costs required to bring the Environment up to these minimum standards are not included in this Services Guide.
- Client must provide us with exclusive administrative privileges to the Environment.
- Client must not affix or install any accessory, addition, upgrade, equipment, or device on to the firewall, server, or NAS appliances (other than electronic data) unless expressly approved in writing by us.

**Exclusions.** Services that are not expressly described in the Quote will be out of scope and will not be provided to Client unless otherwise agreed, in writing, by AHT. Without limiting the foregoing, the following services are expressly excluded, and if required to be performed, must be agreed upon by AHT in writing:

- Customization of third party applications, or programming of any kind.
- Support for operating systems, applications, or hardware no longer supported by the manufacturer.
- Data/voice wiring or cabling services of any kind.
- Battery backup replacement.
- Equipment relocation.
- The cost to bring the managed environment up to these minimum requirements (unless otherwise noted in the Quote).
- The cost of repairs to hardware or any supported equipment or software, or the costs to acquire parts or equipment, or shipping charges of any kind.

### Service Levels

Automated monitoring is provided on an ongoing (*i.e.*, 24x7x365) basis. Response, repair, and/or remediation services (as applicable) will be provided only during our business hours (currently M-F, 8 AM – 5 PM Mountain Time, excluding legal holidays and AHT-observed holidays as listed below), unless otherwise specifically stated in the Quote or as otherwise described below.

We will respond to problems, errors, or interruptions in the provision of the Services during business hours in the timeframe(s) described below. Severity levels will be determined by AHT in our discretion after consulting with the Client. All remediation services will initially be attempted remotely; AHT will provide onsite service only if remote remediation is ineffective and, under all circumstances, only if covered under the Service plan selected by Client.

Trouble / Severity	Response Time
<b>Critical / Service Not Available</b> ( <i>e.g.</i> , all users and functions unavailable)	Response within two (2) business hours after notification.
<b>Significant Degradation</b> ( <i>e.g.</i> , large number of users or business critical functions affected)	Response within four (4) business hours after notification.
<b>Limited Degradation</b> ( <i>e.g.</i> , limited number of users or functions affected, business process can continue).	Response within eight (8) business hours after notification.
<b>Small Service Degradation</b> ( <i>e.g.</i> , business process can continue, one user)	Response within two (2) business days after notification.

affected).	
<b>Long Term Project, Preventative Maintenance</b>	Response within four (4) business days after notification.

\* All time frames are calculated as of the time that we are notified of the applicable issue / problem by Client through our designated support portal, help desk, or by telephone at the telephone number listed in the Quote. Notifications received in any manner other than described herein may result in a delay in the provision of remediation efforts.

**AHT-Observed Holidays:** AHT observes the following holidays:

- New Year’s Day
- Martin Luther King Jr. Day
- President’s Day
- Good Friday – Half Day
- Memorial Day
- Independence Day
- Labor Day
- Thanksgiving Day
- The day following Thanksgiving Day
- Christmas Eve
- Christmas Day
- New Year’s Eve – Half Day

**Service Credits:** Our service level target is 90% as measured over a calendar month (“Target Service Level”). If we fail to adhere to the Target Service Level and Client timely brings that failure to our attention in writing (as per the requirements of the MSA), then Client will be entitled to receive a pro-rated service credit equal to 1/30 of that calendar month’s recurring service fees (excluding hard costs, licenses, etc.) for each day on which the Target Service Level is missed. Under no circumstances shall credits exceed 30% of the total monthly recurring service fees under an applicable Quote.

## Fees

The fees for the Services will be as indicated in the Quote.

**Changes to Environment.** Initially, you will be charged the monthly fees indicated in the Quote. Thereafter, if the managed environment changes, or if the number of authorized users accessing the managed environment changes, then you agree that the fees will be automatically and immediately modified to accommodate those changes.

**Travel Time.** If onsite services are provided, we will travel up to 45 minutes from our office to your location at no charge. Time spent traveling beyond 45 minutes (e.g., locations that are beyond 45 minutes from our office, occasions on which traffic conditions extend our drive time beyond 45 minutes one-way, etc.) will be billed to you at our then current hourly rates. In addition, you will be billed for all tolls, parking fees, and related expenses that we incur if we provide onsite services to you.

**Appointment Cancellations.** You may cancel or reschedule any appointment with us at no charge by providing us with notice of cancellation at least one business day in advance. If we do not receive timely a notice of cancellation/re-scheduling, or if you are not present at the scheduled time or if we are otherwise denied access to your premises at a pre-scheduled appointment time, then you agree to pay us a cancellation fee equal to two (2) hours of our normal consulting time (or non-business hours consulting time, whichever is appropriate), calculated at our then-current hourly rates.

Microsoft Licensing Fees. The Services require that we purchase certain “per seat” licenses from Microsoft (which Microsoft refers to as New Commerce Experience or “NCE Licenses”) in order to provide you with one or more of the following applications: Microsoft 365, Dynamics 365, Windows 365, and Microsoft Power Platform (each, an “NCE Application”). To leverage the discounts offered by Microsoft for these applications and to pass those discounts through to you, we may purchase NCE Licenses for one (1) year terms for the NCE Applications required under the Quote. **As per Microsoft’s requirements, NCE Licenses cannot be canceled once they are purchased and cannot be transferred to any other customer. For that reason, you understand and agree that regardless of the reason for termination of the Services, you are required to pay for all applicable NCE Licenses in full for the entire term of those licenses.** Provided that you have paid for the NCE Licenses in full, you will be permitted to use those licenses until they expire, even if you move to a different managed service provider.

## Additional Terms & Policies

### **Authenticity**

Everything in the managed environment must be genuine and licensed—including all hardware, software, etc. If we ask for proof of authenticity and/or licensing, you must provide us with such proof. All minimum hardware or software requirements as indicated in a Quote or this Services Guide (“Minimum Requirements”) must be implemented and maintained as an ongoing requirement of us providing the Services to you.

### **Monitoring Services; Alert Services**

Unless otherwise indicated in the Quote, all monitoring and alert-type services are limited to detection and notification functionalities only. Monitoring levels will be set by AHT, and Client shall not modify these levels without our prior written consent.

### **Configuration of Third Party Services**

Certain third party services provided to you under this Services Guide may provide you with administrative access through which you could modify the configurations, features, and/or functions (“Configurations”) of those services. However, any modifications of Configurations made by you without our knowledge or authorization could disrupt the Services and/or cause a significant increase in the fees charged for those third party services. For that reason, we strongly advise you to refrain from changing the Configurations unless we authorize those changes. You will be responsible for paying any increased fees or costs arising from or related to changes to the Configurations.

### **Dark Web Monitoring**

Our dark web monitoring services utilize the resources of third party solution providers. Dark web monitoring can be a highly effective tool to reduce the risk of certain types of cybercrime; however, we do not guarantee that the dark web monitoring service will detect all actual or potential uses of your designated credentials or information.

### **Modification of Environment**

Changes made to the Environment without our prior authorization or knowledge may have a substantial, negative impact on the provision and effectiveness of the Services and may impact the fees charged under the Quote. You agree to refrain from moving, modifying, or otherwise altering any portion of the Environment without our prior knowledge or consent. For example, you agree to refrain from adding or removing hardware from the Environment, installing applications on the Environment, or modifying the configuration or log files of the Environment without our prior knowledge or consent.

### **Co-Managed Environment**

In co-managed situations (e.g., where you have designated other vendors or personnel, or "Co-managed Providers," to provide you with services that overlap or conflict with the Services provided by us), we will endeavor to implement the Services in an efficient and effective manner; however, (a) we will not be responsible for the acts or omissions of Co-Managed Providers, or the remediation of any problems, errors, or downtime associated with those acts or omissions, and (b) in the event that a Co-managed Provider's determination on an issue differs from our position on a Service-related matter, we will yield to the Co-Managed Provider's determination and bring that situation to your attention

### **Anti-Virus; Anti-Malware**

Our anti-virus / anti-malware solution will generally protect the Environment from becoming infected with new viruses and malware ("Viruses"); however, Viruses that exist in the Environment at the time that the security solution is implemented may not be capable of being removed without additional services, for which a charge may be incurred. We do not warrant or guarantee that all Viruses and malware will be capable of being detected, avoided, or removed, or that any data erased, corrupted, or encrypted by malware will be recoverable. To improve security awareness, you agree that AHT or its designated third party affiliate may transfer information about the results of processed files, information used for URL reputation determination, security risk tracking, and statistics for protection against spam and malware. Any information obtained in this manner does not and will not contain any personal or confidential information.

### **Breach/Cyber Security Incident Recovery**

Unless otherwise expressly stated in the Quote, the scope of the Services does not include the remediation and/or recovery from a Security Incident (defined below). Such services, if requested by you, will be provided on a time and materials basis under our then-current hourly labor rates. Given the varied number of possible Security Incidents, we cannot and do not warrant or guarantee (i) the amount of time required to remediate the effects of a Security Incident (or that recovery will be possible under all circumstances), or (ii) that all data or systems impacted by the incident will be recoverable or remediated. For the purposes of this paragraph, a Security Incident means any unauthorized or impermissible access to or use of the Environment, or any unauthorized or impermissible disclosure of Client's confidential information (such as user names, passwords, etc.), that (i) compromises the security or privacy of the information or applications in, or the structure or integrity of, the managed environment, or (ii) prevents normal access to the managed environment, or impedes or disrupts the normal functions of the managed environment.

## **Environmental Factors**

Exposure to environmental factors, such as water, heat, cold, or varying lighting conditions, may cause installed equipment to malfunction. Unless expressly stated in the Quote, we do not warrant or guarantee that installed equipment will operate error-free or in an uninterrupted manner, or that any video or audio equipment will clearly capture and/or record the details of events occurring at or near such equipment under all circumstances.

## **Fair Usage Policy**

Our Fair Usage Policy (“FUP”) applies to all services that are described or designated as “unlimited” or which are not expressly capped in the number of available usage hours per month. An “unlimited” service designation means that, subject to the terms of this FUP, you may use the applicable service as reasonably necessary for you to enjoy the use and benefit of the service without incurring additional time-based or usage-based costs. However, unless expressly stated otherwise in the Quote, all unlimited services are provided during our normal business hours only and are subject to our technicians’ availabilities, which cannot always be guaranteed. In addition, we reserve the right to assign our technicians as we deem necessary to handle issues that are more urgent, critical, or pressing than the request(s) or issue(s) reported by you. Consistent with this FUP, you agree to refrain from (i) creating urgent support tickets for non-urgent or non-critical issues, (ii) requesting excessive support services that are inconsistent with normal usage patterns in the industry (e.g., requesting support in lieu of training), (iii) requesting support or services that are intended to interfere, or may likely interfere, with our ability to provide our services to our other customers.

## **Hosted Email**

You are solely responsible for the proper use of any hosted email service provided to you (“Hosted Email”).

Hosted Email solutions are subject to acceptable use policies (“AUPs”), and your use of Hosted Email must comply with those AUPs. In all cases, you agree to refrain from uploading, posting, transmitting or distributing (or permitting any of your authorized users of the Hosted Email to upload, post, transmit or distribute) any prohibited content, which is generally content that (i) is obscene, illegal, or intended to advocate or induce the violation of any law, rule or regulation, or (ii) violates the intellectual property rights or privacy rights of any third party, or (iii) mischaracterizes you, and/or is intended to create a false identity or to otherwise attempt to mislead any person as to the identity or origin of any communication, or (iv) interferes or disrupts the services provided by AHT or the services of any third party, or (v) contains Viruses, trojan horses or any other malicious code or programs. In addition, you must not use the Hosted Email for the purpose of sending unsolicited commercial electronic messages (“SPAM”) in violation of any federal or state law. AHT reserves the right, but not the obligation, to suspend Client’s access to the Hosted Email and/or all transactions occurring under Client’s Hosted Email account(s) if AHT believes, in its discretion, that Client’s email account(s) is/are being used in an improper or illegal manner.

## **Patch Management**

We will keep all managed hardware and managed software current with critical patches and updates (“Patches”) as those Patches are released generally by the applicable manufacturers. Patches are developed by third party vendors and, on rare occasions, may make the Environment, or portions of the Environment, unstable or cause the managed equipment or software to fail to function properly even when the Patches are installed correctly. We will not be responsible for any downtime or losses arising from or related to the installation or use of any Patch. We reserve the right, but not the obligation, to refrain from installing a Patch if we are aware of technical problems caused by a Patch, or we believe that a Patch may render the Environment, or any portion of the Environment, unstable.

## **Backup (BDR) Services**

All data transmitted over the Internet may be subject to malware and computer contaminants such as viruses, worms and trojan horses, as well as attempts by unauthorized users, such as hackers, to access or damage Client's data. Neither AHT nor its designated affiliates will be responsible for the outcome or results of such activities.

BDR services require a reliable, always-connected internet solution. Data backup and recovery time will depend on the speed and reliability of your internet connection. Internet and telecommunications outages will prevent the BDR services from operating correctly. In addition, all computer hardware is prone to failure due to equipment malfunction, telecommunication-related issues, etc., for which we will be held harmless. Due to technology limitations, all computer hardware, including communications equipment, network servers and related equipment, has an error transaction rate that can be minimized, but not eliminated. AHT cannot and does not warrant that data corruption or loss will be avoided, and Client agrees that AHT shall be held harmless if such data corruption or loss occurs. **Client is strongly advised to keep a local backup of all of stored data to mitigate against the unintentional loss of data.**

### **Procurement**

Equipment and software procured by AHT on Client's behalf ("Procured Equipment") may be covered by one or more manufacturer warranties, which will be passed through to Client to the greatest extent possible. By procuring equipment or software for Client, AHT does not make any warranties or representations regarding the quality, integrity, or usefulness of the Procured Equipment. Certain equipment or software, once purchased, may not be returnable or, in certain cases, may be subject to third party return policies and/or re-stocking fees, all of which shall be Client's responsibility in the event that a return of the Procured Equipment is requested. AHT is not a warranty service or repair center. AHT will facilitate the return or warranty repair of Procured Equipment; however, Client understands and agrees that (i) the return or warranty repair of Procured Equipment is governed by the terms of the warranties (if any) governing the applicable Procured Equipment, for which AHT will be held harmless, and (ii) AHT is not responsible for the quantity, condition, or timely delivery of the Procured Equipment once the equipment has been tendered to the designated shipping or delivery courier.

### **Business Review / IT Strategic Planning Meetings**

We strongly suggest that you participate in business review/strategic planning meetings as may requested by us from time to time. These meetings are intended to educate you about recommended (and potentially crucial) modifications to your IT environment, as well as to discuss your company's present and future IT-related needs. These reviews can provide you with important insights and strategies to make your managed IT environment more efficient and secure. You understand that by suggesting a particular service or solution, we are not endorsing any specific manufacturer or service provider.

### **VCTO or VCIO Services**

The advice and suggestions provided us in our capacity as a virtual chief technology or information officer will be for your informational and/or educational purposes only. AHT will not hold an actual director or officer position in Client's company, and we will neither hold nor maintain any fiduciary relationship with Client. Under no circumstances shall Client list or place AHT on Client's corporate records or accounts.

**Sample Policies, Procedures.**

From time to time, we may provide you with sample (*i.e.*, template) policies and procedures for use in connection with Client's business ("Sample Policies"). The Sample Policies are for your informational use only, and do not constitute or comprise legal or professional advice, and the policies are not intended to be a substitute for the advice of competent counsel. You should seek the advice of competent legal counsel prior to using or distributing the Sample Policies, in part or in whole, in any transaction. We do not warrant or guarantee that the Sample Policies are complete, accurate, or suitable for your (or your customers') specific needs, or that you will reduce or avoid liability by utilizing the Sample Policies in your (or your customers') business operations.

**Penetration Testing; Vulnerability Assessment**

You understand and agree that security devices, alarms, or other security measures, both physical and virtual, may be tripped or activated during the penetration testing process, despite our efforts to avoid such occurrences. You will be solely responsible for notifying any monitoring company and all law enforcement authorities of the potential for "false alarms" due to the provision of the penetration testing services, and you agree to take all steps necessary to ensure that false alarms are not reported or treated as "real alarms" or credible threats against any person, place or property. Some alarms and advanced security measures, when activated, may cause the partial or complete shutdown of the Environment, causing substantial downtime and/or delay to your business activities. We will not be responsible for any claims, costs, fees or expenses arising or resulting from (i) any response to the penetration testing services by any monitoring company or law enforcement authorities, or (ii) the partial or complete shutdown of the Environment by any alarm or security monitoring device.

**No Third Party Scanning**

Unless we authorize such activity in writing, you will not conduct any test, nor request or allow any third party to conduct any test (diagnostic or otherwise), of the security system, protocols, processes, or solutions that we implement in the managed environment (“Testing Activity”). Any services required to diagnose or remediate errors, issues, or problems arising from unauthorized Testing Activity are not covered under the Quote, and if you request us (and we elect) to perform those services, those services will be billed to you at our then-current hourly rates.

**Obsolescence**

If at any time any portion of the managed environment becomes outdated, obsolete, reaches the end of its useful life, or acquires “end of support” status from the applicable device’s or software’s manufacturer (“Obsolete Element”), then we may designate the device or software as “unsupported” or “non-standard” and require you to update the Obsolete Element within a reasonable time period. If you do not replace the Obsolete Element reasonably promptly, then in our discretion we may (i) continue to provide the Services to the Obsolete Element using our “best efforts” only with no warranty or requirement of remediation whatsoever regarding the operability or functionality of the Obsolete Element, or (ii) eliminate the Obsolete Element from the scope of the Services by providing written notice to you (email is sufficient for this purpose). In any event, we make no representation or warranty whatsoever regarding any Obsolete Element or the deployment, service level guarantees, or remediation activities for any Obsolete Element.

**Licenses**

If we are required to re-install or replicate any software provided by you as part of the Services, then it is your responsibility to verify that all such software is properly licensed. We reserve the right, but not the obligation, to require proof of licensing before installing, re-installing, or replicating software into the managed environment. The cost of acquiring licenses is not included in the scope of the Quote unless otherwise expressly stated therein.
